# Project ER Diagram

In this diagram, entities and their attributes are shown, along with rudimentary relationships:

In this diagram, the relationships between entities could be described in further detail:

| |: exactly one o{: zero or more |{: one or more

Additional Notes:

- Each member must have a purchase record since their first purchase occurs during registration.

- Members may or may not have registered in a hike before.

- Members may not have concurrent bookings.

- Every hike must be instructed by an employee.

- Each hike contains a trip to one destination only.
